

MONITOR THE INTEGRITY OF TEMPERATURE & HUMIDITY-SENSITIVE FOODS—ANYWHERE!

Use a Thermochron—the World's Smallest, Lowest Cost Temperature Logger and the Hygrochron, Humidity & Temperature Datalogger

If you're shipping frozen foods, produce, meats, or other fresh food, the shift of even a few degrees can mean the difference between delivering a top-grade product or suffering a complete loss. That's why you need to monitor the integrity of your food products throughout the supply chain.

When you attach a tiny Thermochron® anywhere on your shipment, you will know whether the temperature environment changed during transit, by how much and most important, when it occurred. The Hygrochron® logs both the temperature and humidity in the same size package. This way you can find out about the weak links on the temperature or humidity chain.

The stainless-steel casing of the Thermochron® and Hygrochron makes it rugged, reusable, and portable. It is so small that it fits anywhere and is so inexpensive that you can put one on every carton, freezer unit, bin, or boxcar. The *iBTags*, the submersible version of the Thermochron, can be inserted directly in most liquids. With a quick touch, a temperature log covering many days can be downloaded to a PC or PDA.

For tiny size, low cost, and quality assurance throughout the supply chain, use a Thermochron® and the *iBTags*. For more information, visit our Web site at www.alphamach.com.

ACCURATE—better than $\pm 1^{\circ}\text{C}$
SMALL—Fits Anywhere
SUBMERSIBLE Version—For liquid temperature monitoring
SELF-POWERED—No Cables
INEXPENSIVE—Starting at \$18 CAD*
DURABLE—Stainless Steel, 10-yr. Life

Order your \$75 CAD evaluation kit today at www.ibtag.com

Full Featured

- Selectable Alarms and Sample Rate
- Digital Thermometer Measures Temperature from -40°C to $+85^{\circ}\text{C}$
- Logs Up to 8,000 Consecutive Temperature and/or Humidity Measurements

Wide Range of Applications

- Supply Chain Shipping
- Quality control
- Refrigeration / Freezer Systems
- Prevention

Easy to Roll Out

- Basic Software Supplied with possibility of Custom Software solution
- Low-Cost PC and PDA-Based Readers Are Readily Available
